Excavator Protection

Being safe while in the woods is our core belief at Heavy Equipment Armor. Countless hours working on different job situations have taught us that accidents can occur at any given time! That's why Heavy Equipment Armor decided to create something that could protect operators and large equipment.

Bolt-on Excavator Screen

Increase Protection with our **Skeleton Window Guard**

2X2" MESH SCREEN
(PART# EWS-E2)

Easily mounts to the factory door.

No modifications to carrier required.

Overview

2X2" Mesh screen designed to bolt easily to the front of Caterpillar excavators. Our Front Screens follow the contour of the machine's front windscreen which gives it a sleek profile look.

Made of .120 square tube and 1/4 woven wire. A great choice for basic cab protection no matter if you are digging or piling slash.

Who and What is Heavy Equipment Armor?

Heavy Equipment Armor was founded by the owner of Advanced Forest Equipment, who engineered the first disc mulcher for skid steers. Being a mulching contractor for over 36 years, safety has always been a priority. That's why he started designing custom and bolt-on guarding to protect his operators and machines. Too often injuries happen because a machine isn't equipped to protect the operator for the job, he/she is asked to do. Because of this we have designed several different pieces of enhanced guarding that simply bolt to a machine to help prevent costly injuries and equipment down time. All these pieces are designed with a core principle of safety, function, fit and finish.

What do we do at Heavy Equipment Armor?

At Heavy Equipment Armor we create enhanced custom and bolt-on guarding for skid steers and excavators. We manufacture steel guarding, UL752 Level 1 rated ballistic guarding, bolt on custom guarding, running boards, light kits, box guards, top guards and rock guards. When it comes to protecting you and your machine, we have you covered!

What makes Heavy Equipment Armor perfect for Caterpillar owners?

HEA guarding products are designed to work with the original factory components wherever possible. This includes utilizing factory bolting locations to install additional guarding enhancements. Plus, we believe that your guarding should look as good as it works! We build every piece to complement its new carrier with a fit and finish that looks factory.

Why should I buy Heavy Equipment Armor for my Skid Steer or Excavator?

Heavy Equipment Armor's guarding products add another layer of safety for the operator and the machine. A company's most valuable asset is protected - **It's people**. This reduces injuries which reduces costs and improves work quality at the same time.

PLEASE NOTE: This guard is intended as a brush guard only. It is not a certified FOPS/ROPS guard.

Top Cab Guards

Protect your investment by using our top cab guarding on your **Caterpillar Excavator**

**GUARDING FOR TOP OF THE CAB.
DON'T LET FALLING OBJECTS STOP YOU.**
(PART# ETCG-E2)

Installs easily using CAT factory mounting locations
(Part# ETCG-E2)

Allows natural light to show through
(Part# ETCG-E2)

CAT Excavator Top Cab Guards Overview:

Heavy Equipment Armor Top Guards provide additional operator protection for standard construction excavator cabs. Heavy Equipment Armor guards are designed to give operators the peace of mind that their cabin is protected from unforeseen impacts that may encounter on challenging construction and forestry job sites. Designed to fit Caterpillar 307.5E2 & 308E2. This add-on attachment installs in less than an hour without special tools or modification to the cab. HEA cab guard is available for all appropriate applications and as an option to AFE disc mulchers.

Features:

- Allows for natural light to show through while protecting the sky light.
- Includes emergency escape hatch to get out quickly. NOTE: Not all machines have a skylight escape hatch.
- Installs easily through the use of factory mounting locations

Fits current Caterpillar model excavators: 307E2 & 308E2

PLEASE NOTE: This guard is intended as a brush guard only. It is not a certified FOPS/ROPS guard.

Our Story:

Heavy Equipment Armor is the first and only company dedicated to building ballistic window/door, top guard, and cab guard products for heavy equipment. Whether your machine is moving dirt with a bucket, lifting materials on the job site, masticating, demolition, or doing a specialized job with an attachment; You can count on Heavy Equipment Armor's UL 752 Rating ballistic window and cab guards protecting your assets! Our enhanced guarding will be there to help protect the operator and the heavy equipment.

Heavy Equipment Armor was created because of the need for additional guarding on heavy machinery like Excavators and Skid Steers. These machines are increasingly being tasked as stand-alone machines because of their ability to carry multiple different tools to get the job done, and they dominate the modern job site.

Our enhanced products like our cab guards for excavators and skid steer armor add another safety protection level for the operator and the machine. A company's most valuable asset is protected – **It's PEOPLE**. This, in turn, reduces injuries which reduce business costs and disruption. Our heavy equipment protection also improves work quality. Insurance claims decrease in safe work environments with Heavy Equipment Armor's enhanced cab guards and ballistic grade UL 752 windows.
